DETAILED ACTION

Claims 1 to 26 are pending.

Applicants have nearly amended all the claims to the elected group, however the R3 and R4 combining to form a ring with the N would form a hetero ring and hence outside the scope of the elected group.

Applicants should also clearly give the difference to indicate that they are not essentially duplicates.

Regarding applicants request to change the docket #, applicants should provide a separate request to the office for the same.

The Double Patenting rejection on claims 1-8, 15-26 has been since applicants have clearly indicated the difference in the claimed subject matter.

The rejection of the claims 9, 14 and 26 under 35 USC 112 has also been withdrawn since applicants have deleted the term prophylaxis.

Information Disclosure Statement, Examiner has reviewed and initialed it.

New grounds of Rejection

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9, 15-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specifications do not have any description of which beta-blockers or IKr channel blockers, IKs channel blockers nor of the compositions with other active ingredients.

There is no description of the synergism between all the various ingredients.

Genetech Inc Vs Nova Nordisk 42 USPQ 2d 1001.

“A patent is not a hunting license. It is not a reward for search but compensation for its successful conclusion and patent protection is granted in return for an enabling disclosure of an invention, not for vague intimations of general ideas that may or may not be workable.”

Claims 9 is a mechanism claims drawn to a method of treating K channel mediated disorders.

Biochemical pathway or mechanism in the absence of mediating an identifiable “disorder or pathology” is devoid of patentable utility.

Art Unit: 1625

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10-13, 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim recites “therapy” and it is not clear to what extent or what the scope of the term is. Also claim 10 recites “action potential prolongation” and it is not clear what applicants mean by the term.

Conclusion

All the claims are rejected.

An examiners amendment was not done since there were several issues and applicants attorney had to check with their client.
